

Book Review: NOT A STICK

Review by: Brittany McCleery, Millard Public Schools

NOT A STICK is a great book for all ages. It's simple illustrations and text encourages students to get lost in their imaginations, imagining the stick in the story to be anything but! This book could be used with Kindergarten and 1st grade students to encourage them to move at high, medium and low levels (acting out all of the things the stick becomes). For 2nd and 3rd grade students, this book could be used in conjunction with movement creation, by allowing students to create their own ideas about what the stick could become. Finally, 4th and 5th grade students could compose music to accompany each page of the book. This book could also be cross curricular! Check out the link below to see how the book was used for an art project to kick start students' imaginations
